42510
Digital thermometer for oven

DESCRIPTION

The digital thermometer measures and reads the temperature of food items. The metal probe is inserted into the food item and the heat resistant cable is lead out of the oven to the device. The thermometer displays highest and lowest temperatures. An alarm is avalible at preset higher/lower temperature limits. It has a clock (12h or 24h), timer, and a stopwatch. The 1m metre long cable is heat resistant up to 200°C. The thermometer has a foldable display with magnet for fixing.
